

## Comparing Estimated Costs Home Flooring

| Flooring Type   | Average Material Cost (per sq. ft.) | Average Installation Cost (per sq. ft.)    |
|-----------------|-------------------------------------|--------------------------------------------|
| Luxury Vinyl    | \$2–\$3                             | \$2–\$3                                    |
| Laminate        | \$1–\$4                             | \$2–\$8                                    |
| Hardwood        | \$5–\$28 (solid hardwood)           | Included in \$6–\$18 total                 |
| Engineered Wood | \$4–\$12                            | \$3–\$10                                   |
| Ceramic Tile    | \$1–\$20                            | \$4–\$14                                   |
| Natural Stone   | \$6–\$40 (varies by stone type)     | \$6–\$20 (included in \$12–\$30 total)     |
| Concrete        | \$2–\$8                             | \$2–\$8                                    |
| Carpeting       | \$2–\$7                             | \$2–\$9 (materials + labor: \$2–\$9 total) |

Prices can vary significantly based on region, product quality, and installation complexity. For hardwood and engineered wood, the total installed price often includes both material and labor, so labor can be estimated as roughly half of the total installed price.
