

Disappearing TVs: Are They Right for Your Home?

Type of Disappearing TV	Description	Key Features
Rollable TV	A screen that rolls into a base unit when not in use, such as the LG Signature OLED R.	Compact design, smooth motorized mechanism, unobstructed view when retracted.
Transparent TV	Displays that appear as clear glass when inactive, maintaining the flow of the room.	Transparency when turned off, high-quality vibrant image when on, open-concept design compatibility.
Motorized Lift TV	Standard TVs concealed within furniture, ceilings, or floors via lift mechanisms.	Customizable placement, compatibility with existing TVs, versatile for various room layouts.
