Analyzing Examples:

Many of us are working remotely – what's need to have a product office and study area. and more

SPEC PLANNING

for planning the ideas in your home improvement and renovation

Why Specification Planning

The Specification Plan defines the design specifications for your home renovation project.

It will list the size and type of room, the general layout, the plumbing and electrical connections, flooring requirements, wall needs, type of doors and windows, décor elements, the landscaping layout of the yard - including the brand, make, model, color, etc.

You will use the spec plan to bid out the project to a home remodeling contractor and to manage the project.
